Mechanical Seals for Hygienic Applications

Our Experience:

Huhnseal AB has vast experience in designing and manufacturing customized mechanical seals for hygienic purposes. It is imperative to us that our hygienic sealing products are of the highest possible quality and in line with the latest standards and norms.

Huhnseal AB is also an active member of working groups within the EHEDG and 3-A® associations.

We are highly devoted to the process of designing the very best hygienic mechanical seals and improving the standards and norms for hygienic design of mechanical seals and the adjacent equipment.

Hygienically designed component seal

Hygienically designed double semi-cartridge seal

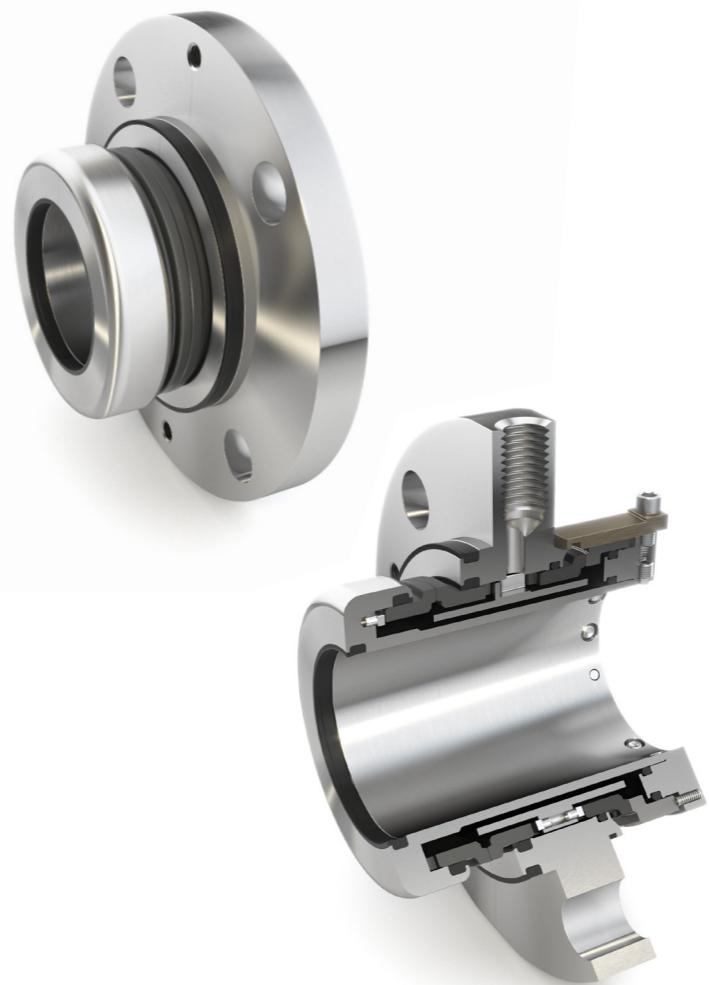

Our Customers:

Typically Huhnseal cooperates with customers that:

- give hygienic design the highest priority
- value a high quality product following the latest standard and norms (EHEDG and 3-A®)
- regard the mechanical seal as a valuable original spare part of the equipment
- want to distribute the mechanical seal in their own distribution channels.
- are devoted to the process of finding the best possible hygienic design solution

Our OEM Offering includes:

- custom hygienic mechanical sealing solutions
- aftermarket exclusivity
- seal selection and sales tools
- spare parts and service
- branding

Hygienically designed cartridge seals

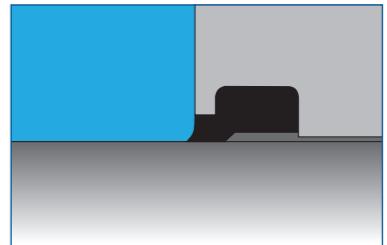

Seal types in our offering:

- aseptic double cartridge seals
- hygienic single and double cartridge seals
- hygienic cartridge seals with integrated bearings.
- top entry dry running cartridge seals
- hygienic single component seals
- designed according to EHEDG and 3-A®

Typical equipments fitted with our mechanical seals:

- top, side or bottom entry agitators
- thru shaft prepared food tanks
- twin shaft pumps
- shear mixers
- large kitchen tilting kettles
- food and beverage centrifugal pumps

Huhnseal LIPORING®

Patented hygienic elastomer profile that satisfies the highest cleanliness demands on the seal.

Crystalline diamond coating for seal faces

Huhnseal has developed diamond coated seal face solutions suitable for dry running top entry applications.
